This diagram illustrates the assembly of a fuel system component. The main assembly is shown in an exploded view, with various parts labeled with numbers 1 through 8. The components include:

- 1**: A long, curved fuel line or hose.
- 2**: A small, cylindrical component, likely a filter or a check valve.
- 3**: Two O-rings or seals, one located at the top of the fuel line and another at the bottom of the fuel line.
- 4**: A small, rectangular component, possibly a bracket or a support.
- 5**: A small, cylindrical component, likely a filter or a check valve.
- 6**: A small, cylindrical component, likely a filter or a check valve.
- 7**: A small, cylindrical component, likely a filter or a check valve.
- 8**: A small, cylindrical component, likely a filter or a check valve.

The diagram shows the fuel line (1) being connected to the main assembly. The O-rings (3) are shown being installed into the fuel line. The other components (2, 4, 5, 6, 7, 8) are shown being installed into the main assembly. The main assembly consists of a large, rectangular block with a complex internal structure, and a smaller, rectangular block with a similar internal structure. The components are shown being installed into the main assembly, with dashed lines indicating the assembly path.
